Subject: Whitney Creek Geotechnical Investigations #58221

Dear Matthew Klein,

I'm sorry I missed the June 30th deadline, but I did want to comment that I am a descendent of a cabin builder, Harold Robinson, from the early 1900's. Our cabin is near mile 6, the Walker family cabin. Many, many friends and family enjoy this treasure.

It is historical and precious. I am praying they will find a fatal flaw to prevent this family heirloom from being destroyed for Aurora Water.

My parents and uncles were also WWII vets and speaking to them when they were still with us about Camp Hale they were so happy to have families camping there and enjoying the valley. I wrote at that time how disappointed we all were that this was taken away from the public for camping which forced so much traffic over into the Homestake Valley. Now the thought of all that money to restore wetland at Camp Hale so they can destroy it in Homestake Valley is hard to understand.

Anyway. Just wanted to add my comments.

Thank you for your time.

Sincerely,

Sharon W. Stackhouse & family
