

Greetings,

I am writing to share my thoughts on Midas Gold Idaho's Stibnite Gold project. There are many reasons why I am excited for Midas Gold's project to come to life and I hope through my comments you will understand why.

The old Stibnite mine site will likely never be cleaned up unless industry takes responsibility for those who came before them. Midas Gold plans to do just that. By mining the site, Midas Gold plans to restore the natural flow and gradient of the East Fork of the South Fork to reconnect historical spawning grounds. The company will repair blowout creek, permanently solving a source of massive sedimentation and habitat degradation. Plus, in reprocessing and repurposing millions of tons of spent ore and unconstrained tailings, Midas will safeguard water quality indefinitely.

Thank you for considering my thoughts on the project. I urge you to move forward with alternative two.

Have a good day,

Name: Justin Skinner
