

Payette National Forest,

I am writing this comment in support of the Stibnite gold project. I am currently employed at the Greens Creek Mine near Juneau Alaska and would love to have the opportunity to return back to work in my home state of Idaho. Not only being able to work back in my home state is important to me but also to work for a company that is willing to clean up a badly damaged area from previous mining that nobody else is doing anything to repair.

My family and myself love spending a lot of our time outdoors camping, fishing, hunting, and riding atvs, and I believe in Midas gold in making the Stibnite area better for everyone while also providing many well paying jobs that many Idahoans need right now. I have been following what has been going on with this project for a while now and I think they are the right people for the job. Thank you for taking the time to read my comment

Yours,

David Soulek
