

Dear Payette National Forest Staff,

Midas Gold Idaho's Stibnite Gold Project poses incredible environmental hazards for one of Idaho's irreplaceable watersheds. I have great concerns for the tailings impoundment plans, the re-routing of the river and for the overall impact of increased traffic in the area.

This project is not a benefit to the state of Idaho. It is a threat to one of Idaho's truly great and sustainable resources, it's water.

Name: Willis Blakeslee
