

Attention Linda Jackson,

I am writing to express my views on Midas Gold Idaho's Stibnite Gold Project. The opportunity presented by the Stibnite Gold Project is compelling for many reasons and it is a project I am committed to seeing come to fruition.

Alternative Two as proposed by Midas Gold is the best solution to protect important fish populations and the environment. It includes several updates from Alternative One that reduce impact to salmon habitat and increase environmental safeguards. Alternative Two will facilitate action as soon as possible. Unfortunately, Alternatives Three and Four would delay the project by two years, slowing down the environmental and economic benefits the Stibnite Gold Project promises to bring. Right now, with the ongoing crisis caused by the pandemic, we need to build a strong domestic supply chain and provide well-paying jobs for Idahoans. A delay in the project would have negative impacts to rural communities. While I know Alternative Five must be considered, we have come too far in this process to take no action at all in the historical Stibnite Mining District. If Midas Gold is not allowed to move forward with its project, the problems facing the region will likely only get worse.

Thank you for considering my thoughts on the project. I am grateful for the virtual meeting room you created. It made learning about the project easy and gave me the tools I needed to submit meaningful comments within the 60-day timeframe. If I can do it, anyone can. I urge you to move forward with alternative two.

Regards,
