

Comments on Lutsen Mountains Ski Expansion Project

I am writing on behalf of future generations and behalf of the wild areas so needed in this time of the Great 6th Extinction. Alternative #1- No action will be the alternative that will do the most good for our planet. During this most extreme time of Climate Crisis and with our scientifically mandated deadline of halving our fossil fuel use by the end of this decade. This project would cause harm by deforestation, increased human activities that rely on fossil fuels and reducing nature ability to have a healthy hydrological system. Anything that we can do to help reduce our building foot print, parking lots and roads is a good start

The National Forest belongs to everyone in our country - both alive and not born. It is important to preserve these wild lands and not have commercial entities take them for their own profit. These forests will become ever more important as every tree and living ecosystem is need to help drawdown the effects of our human actives.

Please reject this misguided Ski Hill Project and choose Alternative #1 for the lasting health of our planet and future.

Sincerely,

Amy Wilson
