

I strongly agree with the statement below. Please approve this mining project, including necessary oversight.

Members of my family have been Idaho property owners in the Cascade Lake area for four generations.

Thank you for the opportunity to comment during the Supplemental Draft Environmental Impact Statement period for the Stibnite Gold Project. This project could help stop our import reliance on China and Russia for antimony and improve environmental conditions at an abandoned mine site. It is important to me to see this project move forward.

The Stibnite project is important to me because it will strengthen our national security through the production of antimony. Right now, the U.S. relies on foreign countries for this mineral. These days, I think Americans value a domestic supply chain for such important minerals more than ever. The project at Stibnite could produce over 100 million pounds of antimony and become our only domestically mined source in the entire country. Antimony is used to make electronics and batteries and is also a critical mineral for national defense and the energy industry. With the uncertainties that the Coronavirus brought to our world and current war in Ukraine, I want our country to do everything it can to protect us from the uncertainty of changing markets and trade wars. I also feel confident in the company's 2021 Modified Mine Plan. In the SDEIS, the company has managed to eliminate the need for long-term water treatment, improve water quality and shrink the size of the project footprint by 13 percent.

Thank you for reviewing my comments. Again, after the USFS has lead a rigorous review process, I urge you to permit Perpetua Resources' carefully thought out plan as outlined under the 2021 Modified Mine Plan.
