COMMENTS (continue on back, as needed):

- 1.) Landowner's Roads will be damaged along the Boone National Forest because of erosion, who will repair them who will have the money to repair them?
2. Erosion: mudslides will run into the creeks, and streams this will cause the fish and minnows to die, there are —

Species that will be in danger, the erosion will cause more flooding.

3.) The flora that is rare to the area will be damaged and never recover, which is a food source for wildlife. If we lose the flora and wildlife, what will bring tourists to the area?

4.) We the people would never be allowed to cut trees from the National Forest, even if it meant our survival. Clear cut or select cutting will do great harm to these areas for many years, to our children, and grandchildren.

5.) I hope you will consider what has been submitted by the people in these areas, as they will be the ones affected by clearcutting, for many years to come. They are the ones that will have to pay the money out to repair the damage.
