Comments: USFS Forsythe II Project

Dear Sirs,

Cuttting the larger trees will dry out the forest, by letting more sunlight and wind in. It will also reduce the ability of the forest to capture and hold water and also to capture moisture from fog, snow, and rain.

Scrap the US Forest Service Forsythe II Project. Replace it with a minimalist, ecologically sound project, such as the one submitted by the Magnolia Forest Group.

Sincerely,

James C. Morris, 60 S. 33rdSt., Boulder,CO 80305,
