Comments: Big Springs & Magnolia Forest area

Good morning,

We've heard that the Forest Service plans to destroy by clear cutting the forest around our homes & I have to ask that instead of clear cutting live trees the Forest Service come in and remove all the piles of dead wood where fields were clear cut a decade ago. There are multiple piles of kindling in fields near our homes that could catch fire. Cutting down dead trees makes sense as long as you remove them instead of piling them up but cutting down live trees makes no sense whatsoever. The beauty of the forest is what inspired us to buy these homes in the first place and we did cut down all dead trees on our own properties when we moved in to help with fire prevention. Please work with the people who live here and help us maintain the beauty & safety of the forest we live in. thankyou, Sandy Shwayder Sanchez
