Comments: Forsythe II Project

Dear Forest Service,

Please do not move forward with the plans for the Forsythe II Project. We've had enough destruction from fires and your clear cutting over the past four years, and people/wildlife should enjoy the forests as they are. The map's designated destruction zones are a travesty. Ruining nature for what short-term and long-term purpose? I respect your work and its people, but these plans are erroneous.

Thank you for reading,

~~~~~
