Comments: USFS Forsythe II Project

Dear Sirs,

I strongly object to the Forsythe II proposal because:

1. It will increase, not mitigate fire danger
2. It will destroy currently well functioning ecosystems and negatively impact local wildlife.
3. It will degrade, not improve forest health and resilience
4. It will increase downslope flooding danger, including flooding in Boulder City and County.
5. It will negatively and unfairly impact housing values for local residents and reduce recreational opportunities for both local residents and the general public.

Scrap the US Forest Service Forsythe II Project. Replace it with a minimalist, ecologically sound project, such as the one submitted by the Magnolia Forest Group.

Sincerely,

Rob Millette
