Title:
Comments: I will make this short and sweet. The National Forest shouldn't be pandering to Mining or Logging. It's time that the National Forest close down to these operations. What should happen is the land they use, they should buy outright. Then when they go to sell the land for much less than what they bought it for, because of their destructive operations, then they will wake up and realize what needs to happen.

The National Forest should be there for only the Taxpayers to use the land to recreate on not destroy. Protect the land. Stop being stupid. Stop leasing the land to the highest bidder.
