Comments: I would like to state my love for the Chugach and the amazing days I've had being out among these incredible mountains. I love to cross country ski, split board, and get my machine out. I am all for a day in the back country without any noise pollution, but I also love the places I can go and see while on my machine. I am all for machines being allowed in the Chugach. I as a person with free will can pick or choose whether or not I want to be around areas with motorized use or away from the noise and enjoying peace and quiet. I think that machines are well controlled in the fact that they are not out ruining vegetation nor do the majority of users disobey closed areas to motorized use. I think that there is plenty of room in the Chugach for all outdoor enthusiasts, no matter how you like to get out. Thank you.
