Title:

Comments: Instead of closing more lands, why don't you open them up for the people to enjoy. It's our land as much as it is yours to take care of. Our groups have always been respectful and followed the rules but too many stipulations and rules are being created and forcing us out of the backcountry we love so much. Open more areas for motorized use. It's what we live for, it's how some of us feed our families, it's where most of us go to keep our homicidal tendencies at bay!
