Comments: Although I do not snow machine, I am a true fan of all recreational motors and being able to ride in national parks. The typical person believes that all motor vehicles like a snow machine, dirt bike, etc. are only ruining the land of every riding zone in the U.S whether it's winter or summer. That is far from true, we all respect the land very much and keep every riding area as clean as we can.

The scenery in CNF is unreal and it means a lot to many good friends of mine. Taking away CNF from anyone that uses it recreationally is taking away memories for many families, friends, and younger ones that dream of riding there. I can say that I've never seen so many people travel from all over North America just to be able to ride the back country that CNF has to offer.
