Comments: I have grown up in Kenai, Alaska and i have always known the chugach forest as a great place for recreational activities. I believe that the forest should remain open to all recreational activities that people can currently enjoy, this includes motorized activities as well. I also believe that with good management that this great area we are lucky to have access to can stay this way and maybe grow to accommodate more types of recreational activities. I know there are other people out there that haven't heard of the proposed changes so when i say these things there are more people unaware, but still hold the same views as i do. Thank you for taking the time to consider my view as well as others in this issue.

Thanks, Jared Frates
