Comments: I've recently been contacted and informed of the Forest Service proposals for revising the Forest Plan. As a scientist and former forester (U.C. Berkeley), I find the proposals to be unacceptable. The planned "destruction" of many areas thru e.g. removing wilderness designation, does not make long-term sense for the benefit or health of the forest, its flora and fauna and geography.

Please consider revising the revisions to benefit the forest as a whole and less for the benefit of corporations.
