Comments: The Forest Service should maintain current protections of Chugach National Fores and recommend to Congress its perpetuation into the future. This world-class wild area deserves permanent protection now and far into the future! This world does not belong to man. This planet is for all Earth life to exist in in accordance with the Sacred and Natural systems which are organized to uphold the goal of living, experiencing, balancing. All forest, all ecosystems, habitats, must be respected and left alone, while we humans must develop respectful means of living here and sharing with all. A good approach includes a vegan, organic diet so that forests and lands and waters and beings and people can return to what they were prior to the population of invasive domesticated animals and the thieves that brought them over and now steal away pristine living elements and lands from the rest of us. A new mindset is crucial now.
