Title:

Comments: My only problem with your proposal is you fail to understand what a wilderness is, just that a wilderness. No roads, no buildings, no recreational snowmobiling, no mining, and no lumbering. Before you know it your state is going to look like the lower 48 states just nothing but roads, buildings, mines, lumbering, and recreational parks. There will be none of the beauty that made Alaska and no natural food for the native people. You need to reconsider your proposals and try to save the wilderness portion of the Chugach National Forest. Thank you.
