Title:

Comments: I would like to see equal for both motorized & non motorized. I don't think it is right to limit motorized activity & non motorized can go where ever they like. I feel there is a way for this to work without closing more land to motorized groups. If we are worried about terrain damage set a snow depth to which the areas open, similar to firemans trail. I was born & raised in the great state, I have been a avid snowmachiner since I could walk. It would be a shame if those of us that enjoy snowmachining were not able to do it anymore because of the opinion of special interest groups. I urge you to consider all parties involved & come up with a plan that work equally for both groups.

In closing, there are a lot of comments on here from people that do not live here. I hope you consider the opinions of those of us that do live here, over people that don't live here. Your plan affects us directly & has no affect on the people that don't live here.

I am a avid outdoorsman & I beleive in conservation that is fair for all. That way we can "all" enjoy what this great state has to offer for years to come.

Thank you
