Title:

Comments: Hello,

I strongly encourage any and all of the leadership involved at the Forest Service to reconsider any decision that involves opening up the Chugach to expanded use. In this critical time of human history, it will be decisions like these that will impact countless generations to come as our pristine wilderness areas become more vulnerable to and or victim to exploitation by the very organizations that have the power to guarantee their protection.

Thank you for reading this, I hope it reaches you.

In perpetuity,

~Daniel Francis
