Title:

Comments: I urge the Chugach National Forest:

- * not to abandon protection for the 600,000 acres you propose to eliminate from the WSA

- * to reverse the terrible recommendation to split the Wilderness Study Area into two smaller units, thereby dramatically shrinking the area

- * to prohibit the so destructive recreational snowmobile use in the WSA

I urge the Forest Service to maintain current protections and recommend to Congress the perpetuation of these protections into the future.
