Title:

Comments: Allowing residential timber harvests, expanded motorized uses, manipulation of habitats, mining, and helicopter-assisted skiing and hiking-would harm this beautiful Wilderness Study Area. It defies common sense. Instead, the Forest Service should maintain current protections and recommend to Congress its perpetuation into the future. This world-class wild area deserves permanent protection now and far into the future!

This land is here for all people and animals to enjoy way into the future. Meddling with its integrity or usage will not leave its pleasure for future generation.
