Comments: I have used the Chugach National Forest for motorized recreation since 2000. I have met lots of great people doing so and have only ever had one instance where a non-motorized user gave me any grief. To limit more or even do away with all together the access provided by motorized vehicles would leave a very large portion of the park inaccessible. I am against limiting, banning, or infringing in any way, access to the Chugach via motorized vehicle.
