

Data Submitted (UTC 11): 2/12/2016 8:24:38 PM

First name: Tess

Last name: Husbands

Organization:

Title:

Comments: It is not national forests and wild lands; it is truly planet Earth, the Earth that provides every single lifeline mankind possesses for life itself. A handful are: oxygen releasing, the balancing of the gaseous composition of the atmosphere, the water cycle and the vital nitrogen cycle that flows from plants to animals. "In Wildness is the salvation of the Earth and the preservation of all life."
