Title:

Comments: Please do not allow residential timber harvests, expanded motorized uses, manipulation of habitats, mining, and helicopter-assisted skiing and hiking to happen in this beautiful wilderness study area. You may feel you have ample land to allow this but believe me once it is ruined by all the afore mentioned it will harm it and the environment, habitats, and wildlife. Take a look at what has taken place in the lower 48 and how much land is gone and can not be saved. Thank you.
