Comments: At a time when this country and, indeed countries all over the world, are taking steps to protect our planet's valuable wild lands, any actions that would place these lands in jeopardy is outrageous and completely unacceptable. Corporate profit should NOT take precedence over our irreplaceable wilderness. Once these lands have been destroyed, they are gone forever. I urge you to make the future our top priority and do not put the wild Chugach Forest Plan revision #40816 into effect.
