Comments: I am writing to voice my opposition to the proposed changes to the Nellie Juan-College Fiord Wilderness Study Area (WSA).

The proposed Chugach plan would also allow residential timber harvests, expanded motorized uses, manipulation of habitats, mining, and helicopter-assisted skiing and hiking.

There needs to be some places in the world that are not trampled by man.

I think that this is a mistake which will adversely effect this pristine wilderness area and I urge you to keep your longstanding promise to protect the wild character of the entire Wilderness Study Area until Congress finalizes its protection.
