First name: Patricia

Last name: Cole

Organization:

Title:

Comments: Please remain true to your promised commitment to protect the entire wilderness area and do not allow such horrendously harmful projects as timber cutting etc. Also the whole idea of separating the Wilderness Study area into separate segments is horrible and will be harmful to wildlife.

Your's is the mandate. Remember when short-term profits are prioritized over long-term protection there will be nothing left for future generations and the people who will profit from commercialization will certainly not be contributing to anything except their own selfish pursuits.
