Comments: I am an avid user of the non-motorized side of Turnagain Pass. It is one of the greatest playgrounds in the world with its natural beauty and restricting motorized vehicles has preserved this. The ski terrain for both Alpine Touring and Nordic is unparalleled.

I was thrilled to hear there was a move to groom a nordic loop at the pass. This forward thinking is what needs to happen more often to continue to combat the shifting snowfall distribution. In my opinion it is a necessity to keep the motorized and non motorized sides separate.
