Title:

Comments: my earlier comments stand; Additionally, I want to strongly implore a much broader inclusion and strongest of protections to the fullest extent possible within all areas of the WSA. These lands are a unique resource. Once special qualities are lost, it may be impossible to reverse conditions. Listening and protecting now will defer degradation/s! Please reverse 2002 ROD & protect, as much as is humanely possible, and especially, the following areas: Knight Island, Glacier Island, PWS Islands, Knight Island Passage and Port Nellie Juan environs, etc. to band and provide continuous corridors. The NFS is our best shot at land stewardship that protects resources for the greater good. It may be a taxing, thankless job but it has to also be incredibly rewarding. Thank you, on behalf of future generations from around the globe, for your tireless efforts.
