Last name: Eastabrooks

Organization:

Title:

Comments: Please manage all of the Wilderness Areas and W Study Areas within the Chugach National Forest according to the strictest terms of the Wilderness Act. All human activities should be limited to minimize any lasting impact on the wild qualities of the land. No machines, no motorized recreation, absolutely no logging or other harvesting of resources, no construction other than very primitive camping facilities and trail building to allow access to this magnificent ecological treasure.
