Comments: Please re think you proposed Forest Plan Revision. In such times of environmental strife forests such as Chugach needs more protection not less. Please help keep this forest and other forests protected and preserved for generations to come. Opening them up for more recreation, lumber production and mineral production may seem like a good idea now but it is not a good move for the forests and the precious eco systems within them. Please be of service to the forests as your name implies and not others economic interests.
