Comments: I just saw the comment period was over today and though I don't have time to write a more in-depth response I want to go on record for maintaining wilderness management and protection for the Prince William Sound portion of the Chugach National Forest. I do not wish to see wilderness protection removed or mining, logging or other motorized use allowed in the areas under consideration. I wish I had more time to present my thoughts but I am glad I could at least weigh in on the Plan. Thank you.
