Title:

Comments: Many Commercial Gillnet and Seine Skiffs involved in the Salmon fishery are powered by high-horsepower engines w/straight pipes(no mufflers) and are extremely LOUD! Disturbing the peace seems the prerogative of each boater...no matter what others think. People on tour boats, Cruise ships, the Ferry and other boaters, hikers, kayakers, and all wildlife have to put up with this LOUD, UN-NECESSARY ENGINE NOISE! ALL boats on the sound, in harbors, etc should have muffled engines, wouldn't you think? The engines loose virvually no HP when the exhaust is properly muffled.
