Title:

Comments: i'd suggest changing the following:

FW-G2-DC-14: not all user-created trails should be restored to natural conditions, some may be added to nf system

FW-G2-DC-10: re-write this statement so that "retaining ecosystem integrity" is the primary concern, not the last concern.

FW-G2-DC-09: move plants to forefront of list instead of being last

FW-0B-05: 800acres for habitat work is way too high, plus another 400 acres...both annual acres treated. id recommend revising to say "up to 200 acres for both wildlife & fire treatments in each landscaper area" (kenai, pws, delta)

Table 3 - ROS: reduce the maximum part sizes for primitive, semi-primitive nm, and semi primitive motorized to 10 for primitive, 10 MA1,15 spnm, and 15 in spm

MA 4 G1 03: AREAS OF NONCONFORMANCE SHOULD NOT EXCEED 1/2 ACRE (currently says 1 acre)
thanks for opportunity to comment. how will my comments be dealt with?
