Comments: I would like to see actual, Land and Resource Management. We do not need anymore wilderness in this county. Rather we need these government lands to be sustainable harvested so that our schools can benefit from actual land management. So that we do not have to be taxed on property that should be paying dividends. Furthermore it is currently one of the largest potential carbon emission emitters because of bad forest practices and potential wild fires. Making it necessary to triple tax to fight forest fires on land that should be providing an income producing crop. We have just had two of the worst fire seasons in recent history. Manage this timber and clean out all dead and infected areas for new growth.
