Comments: I do not want more wilderness

Why

I think it's a proven fact that there is more likeliness that catastrophic fires will burn out of control endangering local communities. Wildlife and recreation. Due to lack of proper forest practices.

I would like to see more timber being harvested.

More proper forest practices of chipping debris and no burn piles left behind from harvest.

More of the money that is raised in harvesting be used for local county controlled forest management of federal land.

I want more roads opened up for all forms of travel on public lands.

Most people that use these roads are very conscientious of how to properly use and take care of the land.

I love berry picking and want to be able to drive to areas. I don't think we should be charged gathering permits.

Open closed camp grounds and let non profits go in and clean up the wood for donation to local seniors.

In my opinion the more involvement of people who do not live in the area on things such as wilderness and millpond, is detrimental to the area. I don't think they should have so much input on areas they do not use or live.
