Comments: I strongly oppose the Colville national forest plan , without further consensus from the Stevens county commissioners. Approval of such plan shall be determined by the popular consensus of the regions inhabitants.... not by those from a far... Approval of a so called plan must be further examined by those who are responsible for tending so called forest lands by vote of the people in the county. To our elected officials, let it be known, the people of the land must be heard, concerning stewardship of our backyard. Let it be also known that prior stewardship has been poor and negligent and we the people have suffered such neglect. Forest fires are prevalent in BLM land by federal agencies that seem to know whats best by their own mandate. We the people of the land know whats best by popular consensus.... Do not dictate to us but rather ask us for guidance to a common cause and good for the people of the land. Please make comment and response thru the local commission. Best Regards for the preservation of our rights to our land..... Brian Gogarty
