Comments: I'm concerned about access for a lot of reasons. And one of them is the forest fire situation that we have. Reading that we've got a grid for so much road per every two miles of forest is not very reassuring to me, because we need to be able to access where fires start very quickly. So, if we're shut out of that in any way it's going to put us all at risk, and none of us knows who the next people are going to be who lose their property because the fires are raging, and we can't get to them.

I also have a problem with having an agency between the agency and the people that we're trying to deal with. We are a small community, and we should be able to get. we've been in several of these meetings, we know that a lot of these things are arranged to minimize the impact of the public's input, and I think that that's wrong. I think that we need to have serious meetings on a local level, but solve local problems.
