Comments: So, I oppose the Proposed Action Plan as it currently stands.

I'd like to promote, too, that we need to work with our County Commissioners because they represent the people. I can reach out and vote for them, I can hold them accountable, and the Forest Service needs to work with them.

I would implore the Forest Service to -- a place to start would be to work with the County Commissioners.

I think, 60 million board feet of lumber per year, so the plan can be adjusted to show that annual harvesting. Also, what that would do would thin out the forest, which would also help with forest fire prevention, or not as intense forest fires.

It would also allow for greater snowpack. And it would also allow for more grass to be grown for all of you wildlife people out there, which means more wildlife to look at. And for the cattle people more grass to be eaten.

So I would encourage greater use of our resources and our land to push back those predators and, thus, fulfilling the dominion mandate and giving glory to the Lord.
