Comments: As public users we, in reviewing each alternative, we feel that we can support none but the No Action alternative.

in that Proposed Action Plan, I read a sentence in there, and I've asked many times, many people, "Why does it say, now, that you are to be managing for a condition rather than a product?" So, the Department of Agriculture, we are about producing for this great nation, so why is it in little tiny fine print it says that, "Now it is to be managed for a pristine condition."
