Comments: I want to say that I do believe that there is a difference between having a hearing, and in a hearing and being listened to, and here we are not being listened to. Coming here, this is the third time I've been to these meetings, not having the Forestry Department here in face is, to me, I feel like I was punched.

Therefore, again, my comment is also based on coordination in this County, which is the promotion of recreational use, our culture, and economics, and I do not -- I want it on the record that I do not believe that the limited use, the view of the two miles of road per square -- the two miles of road per square mile will not promote economic growth and recreational use at all.

Also, the portion that speaks on having areas that can only be grazed down to four to six inches, I want to find out how you can manage that.

I'm running into elk and deer every single day, I'm wondering how you're going to go ahead and keep the elk from knowing where four to six inches is versus telling the ranchers in finding them, how are we going to find the elk, and all.
