Comments: Dear Forest Management Revision team,

I appreciate your openness to feedback from all trail users - it is important to me as I frequent the trails as mountain biker and hiker - by myself, with friends and family.

Living in the PNW, we're so blessed with countless natural resources like the Colville National Forest, and yet each of them very unique. That is why it's important to me to preserve the hiking AND riding experience here... for myself and for my children. Sure, there are other great riding areas, but the Colville offers the quality AND length of trails that's hard to match anywhere in the country as it offers multi-day mountain bike riding experiences.

The region as a whole has great potential to become a national riding destination. This promises low-impact non-motorized trail use and significant economic benefit for communities in Northeast Washington. The ecological and trail resources make this Forest a unique place to ride, and it is of utmost importance to me that mountain bike access is maintained and improved throughout the implementation timeframe of the next Forest Management Plan.

I commend you for your thoughtful approach and thoroughness of the draft plan and preferred alternative. Alternative P is a good solution for both motorized and non-motorized recreational access, ecological integrity, and regional economic resiliency. However, two highly valued mountain bike trail systems would be lost due to proposed wilderness designations in Alternative P. For this reason, I strongly encourage you to implement the following two changes to the plan:

The proposed Bald/Snow/White wilderness designation eliminates a contiguous Kettles Crest riding experience, as well as connection to Thirteen Mile Trail. Bald/Snow/White should be included in the SIA. This unifies all of the Kettle Crest under one management designation and preserves the unique north-south Crest riding experience, as well as un-interrupted access to the Pacific Northwest Trail. This can be accomplished by changing the Coyote Mountain/Hoodoo roadless area to backcountry or wilderness.

The Abercrombie Mountain and Silver Creek trails should be removed from recommended wilderness, and instead designated as backcountry, or another SIA. The Abercrombie and Silver Creek loop should be preserved for mountain bikers as this high alpine riding experience cannot be replicated elsewhere in WA.

With the above changes incorporated, I fully endorse Alternative P. It facilitates trail maintenance needs with chainsaws, allows the Kettle Crest to be designated as one uniform management designation, in turn making it easier to promote and market it as a MUST VISIT contiguous geological, ecological, and recreational destination!

Thank you again for your hard work and opportunity to voice my strong support for maintained mountain bike access to the awe-inspiring trails of the Colville National Forest.

Sincerely,

Pavel Dolezel
