Hiking,skiing and backpacking are my primary recreational activities and I am an advocate for more protection of our forest lands. With this in mind, Alternative R with the 19% wilderness recommendation is the option I prefer. I support the upper diameter limit of 21" on cutting of live trees and fixed reserves for managing late-successional forest structures and old growth habitats. I also support the Quartzite wilderness recommendation near Chewelah, Wa. With a network of trails, this area would fill a need for all those in the community who enjoy the outdoors.
