Title:

Comments: Hi. My name is Pat Thompson, and my husband spoke a little bit ago about that we are wilderness users, I've lived here for 40 years. We've been in wilderness all over the Western United States, and one of the things that I've heard that people don't like about wilderness is that there's no grazing, and I just wanted to comment that most of the wilderness areas that we've been in, we packed in, we camped, we stayed for weeks, most of those wilderness areas have grazing. It's not always great to have them there, but it is allowed, it is legal, and they do graze. So I just wanted to point that out, because as I go around and I hear the arguments against wilderness, that is one of the biggest ones, is that we won't be able to graze anymore in wilderness. And, I'm sorry, but that's just not true. So, thank you.
