Comments: Hello,

I believe it is very important to the scoped trails to be added to the system at Snow Summit. This would address issues on multiple skill levels and increase the enjoyment for all riders up there. It would also drive even more financial benefit for the town of Big Bear since it would extend the usage to different skill levels. As a note since the park has opened I travel up there about twice per month to enjoy the trails during the biking season. Thank you for considering this and I look forward to future expansions.

Regards,

Mike
