Comments: Please allow Big Bear Mountain Resorts to continue to improve and expand their trail network. The bike park is currently too small to handle the volume of people who come to visit on the weekends. Moreover, the existing trails are mainly tailored towards more experienced riders. Congestion coupled with the severe lack of intermediate and beginner trails can make the riding experience unnecessarily dangerous for the visitors of the resort. Building more trails will not only mitigate this problem, but also help encourage more people to visit the town and resort knowing there is a both safe and fun place for them to ride. I love riding at Snow Summit, but purposely avoid visiting on the weekends for the reason listed above.
