Title:

Comments: I'm a resident of Ferry County and after looking at all the alternatives I prefer "P" with the following additions. Much of the work proposed work on the CNF is "Restoration" which in most cases results in no money going to the county where the work was done as compared to "Active Management". Since there may be no actual job benefit to the county if the contract goes to an operator from outside the area, I would propose that some percentage of money generated from "Restoration" be awarded to the county. I would also ask some of the projects be scaled to a size that smaller operators can be compete with larger ones. This would allow the rebuilding of some of the lost infrastructure that happened when harvest levels where low.
